Short-Haired Yuri is here!

Quick information before anything:

- Please check the credits.txt file to properly credit the people that originally did the short-haired version of Yuri! I only did her own MPT by combining and editing assets already existing for it to be the best possible!
- This Cheat Sheet isn't a complete one like the regular MPT since the only differences that are here are some poses of the Turned Yuri and her short hair. Also, to do this Cheat Sheet, I based myself on the regular ones.
- The way to write the attributes of her faces is still the same as the regular Yuri MPT (except some new variations that are shown [here]).

That said, please refer to the original Yuri MPT to do her expressions and such.

Poses

Here are the two standard poses that she can have, both uniform and casual (please note that the default one is the uniform, to show her casual version, add 'casual' after the 'turned' or 'shy' word, as below):

Turned	Shy
show yuri **short hair** turned (**casual**)…	show yuri **short hair** shy (**casual**)…

Her shy pose doesn't have any variations just like her regular long-haired version, but since she doesn't have a strand of hair to take in her hands, she's simply standing like that. Isn't she so cute? 😊

Variations of her turned version

This short-haired Yuri has some new poses for her left arm (from our point of view, her right one), as the scars, the bandages, and others.

Here are the poses and how to write them!

Note: The *rcut* attribute already exists for the uniform version of the long-haired Yuri, but hasn't been done for the casual version

Uniform	Casual
show yuri short hair turned **rcut**	show yuri short hair turned casual **rcut**

show yuri **short hair** turned **rcuts_deep**

show yuri **short hair** turned casual **rcuts_deep**

Perhaps the difference with the regular *rup* attribute isn't obvious, so here is a zoom:

show yuri **short hair** turned **rolled_up_cuts**

Same thing, here is a zoom:

show yuri **short hair** turned casual **rolled_up_cuts**

show yuri **short hair** turned **rbandages**

show yuri **short hair** turned casual **rbandages**

Here's a zoom of the bandages:

show yuri **short hair** turned **rolled_up_bandages**

Here's a zoom once again:

show yuri **short hair** turned casual **rolled_up_bandages**
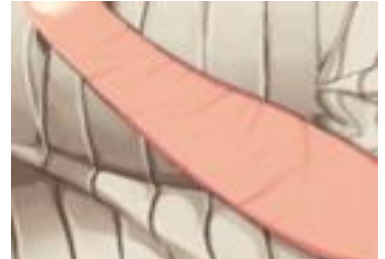

She no longer has cuts but scars with this attribute:

show yuri **short hair** turned **rhealed**

She no longer has cuts but scars with this attribute:

show yuri **short hair** turned casual **rhealed**

As always, there are still the *lup, rup, ldown, rdown* attributes for her left and right arm, and her special expression that you can still use by writing the '*scream*' attribute (which replaces the *s_scream* one):

show yuri **short hair** turned (casual) **scream**
